

DJAGO

DIVING PACKAGE

Lembeh /ləmbe/

The 25 km long and 2 km wide Lembeh Island is separated from the mainland of Sulawesi by a narrow stretch of water, the Lembeh Strait, worldknown for its extremely high density of rare and unusual marine life, in particular frogfish, rare species of octopus, seahorses, and nudibranchs.

Thanks to the protected geographical features of Lembeh Strait, diving is available throughout the year and would be rarely cancelled due to bad weather.
